# Application procedure

1. Send this referral form with complete patient record to the MRI Centrum by fax: +31 880 8888 99 or e-mail to [afspraak@mracentrum.nl](mailto:afspraak@mracentrum.nl).
2. We try to call your patient within 1 day. If we can't reach your patient, they can contact us at: +31 880 8888 88.
3. Your patient will receive additional information about the MRI and a route description after making the appointment.

## Important

If you suspect your patient has a metal fragment in their eye, it is important to check this first with an X-ray. The splinter has to be removed before scheduling a MRI scan.

If your patient suffers from claustrophobia or is unsure in general, it can be advised to prescribe a mild sedative like Xanax 0.5 mg.

Please make sure you fill in the form as readable as possible. To avoid mistakes or misunderstandings we will not accept incomplete referral forms.
